Tommy Robinson
Senior Manager, Supplier Quality

**Gulfstream Aerospace Corporation
Quality Assurance Department
P.O. Box 2206 M/S Y-05
Savannah, Georgia 31402**

Signatures on File

SCOPE:

This document lists Gulfstream Aerospace approved process sources. **Unless formally Delegated otherwise**, per the Gulfstream Procurement Quality Group as a Delegated Duty Supplier, **ONLY** sources listed herein may be utilized to perform processing and testing on parts of **Gulfstream Design** which are furnished to Gulfstream Aerospace. A process performed by a non-approved source may be cause for rejection of the item(s). Approvals are issued in two distinct categories and are as follows:

1. Suppliers who manufacture items to GULFSTREAM Design MUST ONLY USE those process sources listed herein.

Suppliers who manufacture items to GULFSTREAM Design, Design Control Specifications or Specification Control Drawings requiring the use of GULFSTREAM process specifications **MUST** also use only those sources listed herein unless otherwise authorized.

The list of approved sources is based on an evaluation audit of the process facility by the Gulfstream Aerospace Procurement Quality Group. Should a supplier wish to use a process/facility not listed in this document, a request must be submitted in writing to the cognizant buyer. This request must include the name and address of the source, and:

- A. The applicable part number(s).
- B. The process(s) the supplier will perform.
- C. An explanation of why a listed source cannot be used.

An evaluation will then be made by GULFSTREAM Procurement Quality, Purchasing, and Engineering to determine need, capability, and conformance to the approved data.

Items manufactured to Design Control Specifications and Gulfstream or commercial standards:

In the case of parts of this nature, process sources not listed herein may be used, except when the use of GAMPS are applicable, provided the supplier can provide objective evidence of capability and control of the process source. This objective evidence shall consist of records such as audits, tests and/or surveillance, as required to assure control of the process source. A listing of these facilities must be available for review by GULFSTREAM Procurement Quality, who reserves the right of disapproval of any process facility not considered satisfactory.

NOTE: Gulfstream Specifications that are designated as GSS have been Superseded by GAMPS specifications. The succession list is located in GAMPS 1001.

If there is a question as to the latest approval status of a supplier, the Gulfstream Procurement Quality group should be contacted to confirm the approval in question.

Gulfstream Aerospace Suppliers are required to receive certification from all process sources and review these for assurance of compliance.

The use of process sources listed herein is not intended to ensure or imply that work processed by these sources will be acceptable.

The GULFSTREAM

Suppliers are responsible for the transmittals of all pertinent purchase order requirements and applicable specifications to the process source.

It is the responsibility of GULFSTREAM Suppliers' to assure conformance to all applicable specification requirements.

FORMAT:

This listing is by Process Code and includes the Process Designation the supplier is approved for.

REFERENCE:

This document is in concert with the requirements established in SQAR-0001 and SQAR-0003 (Supplier Quality Assurance Requirements) and SAE AS9100 Quality Management System as well as AS9003 Inspection and Test Quality System.

PROCESS SOURCE LIST

CODE	ABBREVIATION	PROCESS-DESCRIPTION
